### Digestion in stomach

1. Briefly explain digestion in stomach

|            | Part                    | Description |
|------------|-------------------------|-------------|
| Anatomy    | Fundus                  |             |
|            | Body                    |             |
|            | Pyloric region          |             |
|            | Cardiac sphincter       |             |
|            | Pyloric sphincter       |             |
|            | Greater curvature       |             |
|            | Lesser curvature        |             |
| Histology  | Mucosa (Gastric glands) |             |
|            | Submucosa               |             |
|            | Muscularis externa      |             |
|            | Serosa                  |             |
| Physiology | Pepsinogen              |             |
|            | Hydrochloric acid       |             |
|            | Intrinsic factor        |             |
|            | Mucous                  |             |
|            | Water and electrolytes  |             |
